

PPG - Cardiology Specialty Clinics

Parkview Heart Institute remains dedicated to developing outpatient clinics that meet the needs of referring physicians and our community, in conjunction with Parkview Physicians Group – Cardiology and Parkview Physicians Group – Cardiovascular Surgery.

In these clinics, physicians and other members of the care team address a broad range of cardiovascular conditions for referred patients. Physicians and staff members at Parkview Heart Institute would be pleased to work with you to improve quality of life for your patients.

Three other sub-specialty clinics for Hypertension, Lipid and AFib require specific requests for following criteria and being sure testing is completed prior to the appointment to facilitate the highest value care for patients.

Parkview Heart Institute has created a tool for Primary Care Providers for referrals and transition of stable patients back to their primary care providers. This document has valuable information on PHI protocols.
