

# PPG PROVIDER LIAISON NEWS

## What Is Precision Genomics?

The ultimate goal of the **Precision Genomics** program is to get the right treatment to the right patient at the right time. The team services the entire Parkview Health System, with attention currently focused on oncology patients at the PFCI. Expansion to other service lines in the health system including Cardiology and Behavioral Health is currently underway.

To request services from the Precision Genomics team, place referral #277 in Epic or email [Genomics@Parkview.com](mailto:Genomics@Parkview.com).

## Specialty Communication

### ❖ Sleep Medicine

- Insurance requires an office visit for sleep study orders (phone call or MyChart messages are not accepted)
